

Strategy of how to win a Crib Drive

Question,

Why have many, many experienced Crib players never won a Crib drive?

For the answer we must look to the end of a Drive and the declared winner.

Answer,

The declared winner has the highest total of . . . POINTS.
Remember, it is Points that win Crib Drives not legs or games.

In a Crib league game we use our skill and experience to second guess our opponents cards and try to advance round the board to the home hole by not getting into runs, not pair or tripling. The winner is always the player that gets into the home hole first in the best of three legs is the winner.

To win a Crib Drive we have to score as many points throughout the games as we can and that means purposely playing into runs of three, four or more, pairing, tripling and were possible playing four of a kind all of which score many points.

We may lose the individual game but if we have scored the most points at the end of the Drive then we are the winner.

Now you know the secret, good luck and good Cribbing.
